Information Security Management ISO-27001: 2013

Information Security Management ISO-27001: 2013

What this means? – The ISO: 27000 family of standards helps organizations keep information assets secure.

Using this family of standards will help your organization manage the security of assets such as Financial Information, Intellectual Property, Employee details or Sensitive Information entrusted to you by third parties.

ISO:27001 is the best-known standard in the family providing requirements for an information security management system (ISMS). There are now 114 controls in 14 groups and 35 control objectives necessary for certification:

- A.5: Information security policies (2 controls)
- A.6: Organization of information security (7 controls)
- A.7: Human resource security - 6 controls that are applied before, during, or after employment
- A.8: Asset management (10 controls)
- A.9: Access control (14 controls)
- A.10: Cryptography (2 controls)
- A.11: Physical and environmental security (15 controls)
- A.12: Operations security (14 controls)
- A.13: Communications security (7 controls)
- A.14: System acquisition, development and maintenance (13 controls)
- A.15: Supplier relationships (5 controls)
- A.16: Information security incident management (7 controls)
- A.17: Information security aspects of business continuity management (4 controls)
- A.18: Compliance; with internal requirements, such as policies, and with external requirements, such as laws (8 controls)
